IMPORTANT TO MARRIED WOMEN

Mrs. Mary Dimmick of Washington tells How Lydia E. Pinkham's Vegetable Compound Made Her Well.

It is with great pleasure we publish the following letters, as they convinc-ingly prove the claim we have so many times made in our columns that Mrs.

Pinkham, of Lynn, Mass., is fully qualified to give helpful advice to sick women. Read Mrs. Dimmick's letters.

Her first letter: Dear Mrs. Pinkham :-"I have been a sufferer for the past eight years with a trouble which first originated from painful menstruation—the pains were excruciating, with inflammation and ulceration of the womb. The doctor says I must have an operation or I cannot live. I do not

have an operation or I cannot live. I do not want to submit to an operation if I can possibly avoid it. Please help me."—Mrs. Mary Dimmick, Washington, D. C. Her second letter; Dear Mrs. Pinkham :-You will remember my condition when I last wrote you, and that the doctor said I must have an operation or I could not live. I received your kind letter and followed your

advice very carefully and am now entirely well. As my case was so serious it seems a miracle that I am cured. I know that I owe not only my health but my life to Lydia E. Pinkham's Vegetable Compound and to your advice. I can walk miles without an ache or a pain, and I wish every suffering woman would read this letter and realize what you can do for them."—Mrs. Mary Dimmick, 58th

and East Capitol Streets, Washington, D. C. How easy it was for Mrs. Dimmick to write to Mrs. Pinkham at Lynn, Mass., and how little it cost her-a two-cent stamp. Yet how valuable was the reply! As Mrs. Dimmick says-it saved her life.

Mrs. Pinkham has on alle thousands of just such letters as the above, and offers ailing women helpful advice.

THE PULPIT.

in his knife. "Et tu Brute," moaned A BRILLIANT SUNDAY SERMON EY DR. M. W. STRYKER. PRESIDENT OF HAMILTON COLLEGE.

Subject: Service. Brooklyn, N. Y .- Dr. M. W. Stryker President of Hamilton College, Clinton, N. Y., occupied the pulpit of the Hanson Place M. E. Church in the absence of Dr. Locke, the paster. He preached the following sermon on "Service:"

My text is that verse in the twelfth chapter of the epistle to the Romans in which the apostle says that there are some things hard to be understood which the unlearned and the unstable wrest to their own destruction. It is true that Satan often hides in the dark passages of God's word. It is also much that the hardest things to understand are not those that the intellect has to unravel and explain, but the things that concern the deeds. For my part, whoever else may have found it hard, have not found the ninth chapter of Romans as hard as the twelfth. Even if I did not do it very well it was easier to think straight than it is to be good. It is a wonderful thing that, after all hese mighty, reverberating words, that search the very heights and depths of the plan of God that make this letter so compact up to this point, it all broad. ens out in the most natural fashion into administrative matters. I notice that the thing about the twelfth chapter is that it does not say anything about what we must not do. It is always true that if you get light in darkness will go out. The way to keep our hearts empty of evil is to fill them up to the brim with good. We do not get the darkness out of this room with a broom, but with a match or a spark. Dr. Thomas Chalmers used to speak about the "expulsive power of the new affection." To many a man who never amounted to anything the honest, pure love of a true woman has been an incentive to him to make something of himself for her sake; and whetever the love of God comes into the human beart it drives out evil and seeks to clothe itself with living and loyal action; and if there is any one who thinks the deed is easy and the doctrine hard, that is not my experience. I want to speak to-night upon this

special admonition to service which Paul says is reasonable. God does not ask anything that is not rational. replied: "If you were running for Christianity and Christian living can give account of themselves. There is nothing so silly as to be a sinner. It makes angels weep and devils laugh to see a man trying to serve God and himself. That man is walking north and south; it is a straddle. Now Paul says it is a reasonable service. He said, try it, put it to the proof, and he was an expert who had tried it for thirty years. I am going to take one special line of analogy. You have often heard it said of a man of intense activity that he was a "perfect steam engine," and that would be said more often if there were more men who were what they ought to be, "a perfect steam engine." I think there is a sermon in that, and I am going to try te get at it. You will help. You will think a great many things which I won't and preach a sermon to yourselves about being perfect steam engines. For our present purposes we will talk about that perticular style of steam engine, the railway locomotive. America is doing a great business in making these, and wherever they are sent-Africa or South America or Asia, every one of them is a kind of missionary force, a living testimony of that force and skill which are resident in British sailors have odd nicknames free mankind. The call now is loud and clear for Americans who shall be to teach the manhood. The tide of time is rising and sinew and muscle are called into the service of God. This is no time for haping or leitering.

Look out upon this world and see

how God is compressing and packing

it together. If we won't take our Gospel in the missionary ship, it shall go in the warship. Somehow men are going to be brought together. We are a conceited lot, we Americans, but we do not like to be told so. We have a good thing, and like to keep it. We say of the Chinese, "shut them out; put them aside." And perhaps of some others, also, "Don't let those good-fornothing Russians, Poles and Italians Bless your heart! Your great come. grandfather or grandmother was nothing but an emigrant-mine was Dutchman, at that. We are all the children of immigrants; we are all intruders on this continent. The only Americans are not now citizens, but ive on pensions. We have stolen evcrything they had that was in sight. You had better not talk about that. Ged's plan is to keep the races of this world marching and moving. Yet, somehow, some cannot get it through their thick heads, their gold-plated heads, their noddles, hard with cruel ambitions and paltry pride, that when the Scripture says, "He made of one blood all nations," it means what it says. If you won't learn it by peace on will learn it by war; if you won't earn it in Bibles, you will learn it by bullets; if you won't learn it in packed Europe and Asia and go there, God will bring those people here. Let them I laugh at all this talk about checking immigration. King Canute might just as well have tried to throw back the waves with his mandate. In a certain sense it is proper to say that God is a mighty utilitarian. It is a great time for service; we need to wake up, it was nearly daylight, it is dawn, great things are coming. Therefore, I think that our churches, colleges, schools and homes ought to engage in

That wonderful, intricate enginewho made it? Did a baby locomotive grow up into that great machine? You say it is evolution. Evolution describes the way a thing is made, but never made anything. The process of making is evolution. If you ask me if I believe God made this world by process, I say yes. That is the way He makes everything. When He makes anything that can grow He gives it a chance to grow. His plans are made and I don't care where He began! I care more for where He ends. You say it took a long while. Yes, the larger the pattern, the larger the plan. Our steam engine is a fine instance of evolution. It is man's creation and it represents his Creator's idea and intention. It is a wonderful epitome of mind working for an intended end; of a purpose perfected by thought. And your bodies? They just happened? The steam engine had to be made and vou are an accident? A master mechanic and designer, he is a mere chance? Do not think it. Where is our reason? God is back of this adaptation, this mighty thing that we call Our purposes are the service.

the manufacture of locomotives.

gine is made with a purpose. The railroad company owns it. They employ an engineer to run it. Now in a sense it is his; it is his to use and conrel, but it is not his to sell. It is his to take care of and to get as much as ie can out of, but in no other way. But if he takes a notion that he can run

And, second, your perfect steam en-

That is first.

the whole road and ignore schedules and orders then very soon from him will be taken even that which he seemed to have. Now, we do not own IS CNE AS NECESSARY AS THE our bodies-these engines. We are the engineers, but not the owners. My body is mine only in a relative sense. I am to give account for it. You say, "May not a man do what he will with his own?" Certainly, if you own anything. What is the engine for? To look at? No. for use. Is it made to be destroyed? If so it might just as well be made of wood and paint or a chromo engine. Some men are such they look like the real thing, but they do not act like it. You have seen a model engine under a glass case; that you wind up. The wheels go, but the engine does not. The wheels work easily because they don't touch the track. I have seen some men and I suppose there are some women, who are wound up with keys. The wheels buzz, but there is nothing done. There are people who sit in a theatre, and the tears run down their cheeks, and they think they are good because they can They pay \$1.50 for the privilege cry. weeping. We all know how we smooth ourselves when a tear comes. We feel penitent and say, "We are not so bad as we thought." It is a toy engine, the wheels go, but it does not advance. A perfect engine is meant to do something in the world, and so are we if coupled to the task that God gives us. Some people don't want to pull, they want to be pulled. always see a dead engine in the middle of a train. Which end of the train do you like, the front or somewhere in the middle? God give us the front. with all its dangers and perils and

Perfect engines get hold of the track. Orders come with lightning rapidity to the engineer, and they must be obeyed without question. The responsibility for the orders is not with him. his responsibility is to execute them. God can run this world, but He has put it into your hands to run yourself. When you stop at the end of the road you can be perfectly certain that if the passengers are too busy to take notice of you, you will not be forgotten by the manager. Well, I have mixed it. The engineer and the engine to-gether—that is the way we are. We are the engines? Yes. We are engineers? Yes. I said at the outset, "You preach the sermon." I think there is a great analogy in it. I think there is a living parable for those who have eyes and ears. Respoisibility? Yes. lot's of it. But, then, who will shirk that? Danger? Plenty, but you are a man. Work? Yes, but that is all you are for. We are not made for nothing. Covet the place. Ride with hand on the throttle, making the best time, within safety, that a man can make. Ride right over the driving wheel. There is where the best men have always sat. Then, by and by, when this engine is worn out, you will get a

better one. Morbus Sabbatleus. Morbus Sabbaticus, or Sunday sickness, a disease peculiar to church members. The attack comes on suddenly felt on Saturday night; the patient chambermaid smelled gas in his room. sleeps well and wakes feeling well; eats a hearty breakfast, but about church time the attack comes on and continues until services are over for the morning. Then the patient feels easy and eats a hearty dinner. In the afternoon he feels much better, and is able to take a walk, talk about politics, and read the Sunday papers; he eats a hearty supper, but about church time he less another attack and stays at home. He retires early, sleeps well and wakes up Monday morning refreshed and able to go to work, and does not have any symptoms of the disease until the following Sunday. The peculiar features are as follows 1. It always attacks members of the

2. It never makes it appearance except on the Sabbath. 3. The symptoms vary, but it never interferes with the sleep or appetite.

4. It never lasts more than twentyfour hours. 5. It generaly attacks the head of the family.

6. No physician is ever called. 7. It always proves fatal in the endsoul S. No remedy is known for it except

9. Religion is the only antidote. 10. It is becoming fearfully prevalent and is sweeping thousands every year prematurely to destruction.

A Hard Lesson. Of all the lessons that humanity has to learn in life's school, the hardest is to learn to wait. Not to wait with folded hands, that claim life's prizes without previous effort, but, having struggled and crowded the slow years with trial, seeing no result such as effort seemed to warrant-nay, perhaps disaster instead-to stand firm at such a crisis of existence, to preserve one's

poise and self-respect, not to lose hold

or relax effort, is greatness, whether

achieved by man or woman .- Reformed Church Record. The Past a Guarantee For the Future. If we would reassure our restiess hearts that our future is in the hands of God we have but to scan our past. Can any man that is not altogether blind look over the way he has traversed without surprise and awe as he sees it marked everywhere by mysterious footprints of the living God? We thought we were going a way of our own, and all the time we have been on the King's highway,-J. E. Me-

Fadyen. Looking For the Saviour. Some people live looking within at their failures. Some live looking around at their hindrances. Some live looking for the Saviour-they face the

sunny South .- Mark Guy Pearse. Many would rather be in sin than out of style.

If the wishes of the American people had prevailed, Fitzhugh Lee would have been buried in the Campo Santo at Arlington, and a stately shaft would have risen there to his memory. But his own desire has prevailed, very rightfully, thinks the Hartford Courant. Years ago, as we now learn, he told his family he wanted to be buried in the Hollywood Cemetery at Richmond when the time came and on one occasion at least he pointed out the very spot-near Jefferson Davis's grave-where he wished his grave to be made.

Several Atlantic liners arrived in New York harbor within a single day, bringing to our shores 12,000 immigrants. The New York newspapers say the new arrivals are a sturdy lot, and that few or none of them will be sent back. The steamship companies closely scrutinize applicants for passage on the other side, and few deportations, therefore, become neces-

Paris is to use automobile garbage carts in the future.

GAS AND WATER.

OTHER?

Citizens of Large Cities Say It Ts.

New York, June 13 .- In the recent agitation here about the price of gas, the demand for lower rates was subported by the argument that every resident is as dependent upon a supply of gas as upon a supply of good water. It has come to pass that the day laborer uses gas as his only fuel for

cooking, because of economy, and the rich man uses gas on account of its convenience. Gas for lighting, with modern improvements in burners, is cheaper, better and more satisfactory than any other kind of light. Gas sells at \$1.00 per thousand cubic feet in large cities, and from that to as high as \$3.00 in smaller towns.

The consumer of gas in the country uses Acetylene (pronounced a-set-alene), and each user makes his own gas and is independent of Gas and Electric Companies. Acetylene is a more perfeet illuminant than the gas sold by the big gas companies in the cities, and the cost to the smallest user is about the equivalent of city gas at 85 cents per thousand.

Acetylene is the modern artificial light, the latest addition to the many inventions that have become daily necessities.

The light from an acetylene flame is soft, steady and brilliant, and in quality is only rivaled by the sun's rays. If water and a solid material known as Calcium Carbide are brought into contact, the immediate result is the making of this wonderful gas. The generaties of acetylene is so simple that experience or even apparatus is not necessary to make it. If it is desired to make it for practical lighting, and to keep it for immediate use, then a small machine called an "Acetylene Generator" is employed. There are many responsible concerns making acetylene generators. In practice this gas is distributed in small pipes throughout buildings, grounds or entire cities and towns in the same manner as ordinary city gas. Acetylene is the only satisfactory means of lighting isolated buildings located in the country or suburbs at a distance from city gas or electric plants.

Trivial Accident May Cause Death. The vibration caused by a passing elevated train jarring a small sharpedged mirror from the wall so that it fell across a rubber gas tube may cost the life of Daniel Meschien, who was found dying on the floor of the Iroquois hotel in New York, early the other morning. Meschien went to the hotel one night, and next day the She summoned help. With an ax the door was broken down and the man found almost asphyxiated. He was carried to the fresh air and an ambulance summoned, which took Meschien to St. Vincent's hospital. Investigation showed that the small mirror had been jarred from the wall in such a manner that it severed the rubber tube connecting the gas jet with a small gas heater.

Tree's Strange Crop. There is a curious sight in the fork of an umbrella tree on Washington street, between Fourth and Fifth avenues. It is a fine growth of wheat almost ready to come out into head. The stocks are nearly two feet long and the blades broad and healthy loo ing. It was at first thought that this growth consisted of shoots from the tree, but on closer examination it was found to be wheat. It has no foundation of earth, or if there is any it is so hidden by the growth as to be invisible. The wheat grains in some way found lodgment in the crevices of the bark and have probably had no other earthy bed than that formed by dust which during the dust storms of the summer was blown there .- Arizona Republican.

It is the fashion to deride Russia and exhibit to the public every defect in her new penal system and social organization, and yet is is only fair to admit that under an autocracy, which is the abhorrence of all freeborn Americans. Russia has done what we could not do, decreed emancipation without a war and abolished capital punishment.

FEED YOUNG GIRLS. Must Have Right Food While Growing

Great care should be taken at the critical period when the young girl is just merging into womanhood that the diet shall contain all that is upbuilding, and nothing harmful.

At that age the structure is being formed and if formed of a healthy, sturdy character, health and happiness will follow; on the other hand unhealthy cells may be built in and a sick condition slowly supervene which, if not checked, may ripen into a chronic discase and cause life-long suffering.

A young lady says: "Coffee began to have such an effect on my stomach a few years ago, that I was compelled to quit using it. It brought on headaches, pains in my muscles, and nervousness.

"I tried to use tea in its stead, but found its effects even worse than those I suffered from coffee. Then for a long time I drank milk alone at my meals, but it never helped me physically, and at last it palled on me. A friend came to the rescue with the suggestion that I try Postum Coffee.

"I did so, only to find at first, that I didn't fancy it. But I had heard of so many persons who had been benefited by its use that I persevered, and when I had it brewed right found it grateful in flavor and soothing and strengthening to my stomach. I can find no words to express my feeling of what I owe to Postum Food Coffee!

"In every respect it has worked a wonderful improvement - the headaches, nervousness, the pains in my side and back, all the distressing symptoms yielded to the magic power of Postum. My brain seems also to share in the betterment of my physical condition; it seems keener, more alert and brighter. I am, in short, in better health now than I ever was before, and I am sure I owe it to the use of your Postum Food Coffee." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

ACCOUNTED FOR THE DOLLAR. His Health Was Wrecked,

Beggar's Windfall Due to Somewhat

Remarkable Circumstance. Representative Branch of Morgan county, the "military man" of the house, has nad some unusual experiences. The fact that he is a chairman of the committee on military affairs very often causes his colleagues

to ask him for stories. "It was while attending a military school a good many years ago that I formed the habit of taking long walks before breakfast," said Branch to a group of friends. "One morning I happened to be strolling through the town near which the school was located, when I was 'touched' by an old fellow, whose tale of hard luck would have melted a stone.

"'But, my good fellow,' I said. 'I haven't a cent with me this morning. I spent my last penny last night, and my check from home won't reach me until to-morrow.'

"The old man wasn't satisfied. "'Look through your pockets,' he

begged, 'maybe you'll find something.' "'Well, if I've got any money in these clothes you can have every cent of it, I said to him, and I began turning my Lockets inside out just to show him that I was 'strapped.' "Well, would you believe it, a silver

dollar dropped out of one of my pockets and rolled on the sidewalk. Delighted, the old man quickly grabbed it up and said, 'Thanks.'

"He was much bigger than I and I said, 'Certainly; I am glad I can help you, but, really I didn't know it was there.'

"All the way back to school I wondered how that dollar came to be inmy trousers. "And did you ever find out?" asked

another legislator. "Oh, yes; when I got back to my room my roommate told me that I was wearing his pants."-Indianapolis

Railway Rate Legislation. At the biennial convention of the Order of Railway Conductors, recently held at Portland, Oregen, resolutions were unanimously adopted voicing their sentiments as to the effect of proposed railway rate legislation on the 1,309,000 railroad employes, whom they in part represented. These resolutions "indorse the attitude of President Roosevelt in condemning secret rebates and other illegalities, and commend the attitude of the heads of American railways, who, with practical unanimity, have joined with the President on this question." They then respectfully point out to Congress the "inadvisability of legislation vesting in the hands of a commission power over railway rates, now lower by far in the United States than in any other country," bycause such regulation would "result in litigation and confusion and inevitably tend to an enforced reduction in rates, irrespective of the question of the ability of the railroads to stand the reduction, especially in view of the increased cost of their supplies and materials.' They further protested against such power being given to the present laterstate Commission because "the proposed legislation is not in harmony with our idea of American jurisprudence, inasmuch as it contemplates that a single body shall have the right to investigate, indict, try, condemn and then enforce its decisions at the cost of the carriers, pending appeal, which is manifestly inequitable."

The conductors hase their demand for only such legislation, if any, as would "secure and insure justice and equity and preserve equal rights to all parties concerned" on the ground that the low cost of transportation "is the result of the efficiency of American railway management and operation which have built up the country through constant improvement and development of territory, while at the same time recognition has been given to the value of intelligence among employes in contrast to foreign methods, where high freight rates and lowest wages to employes obtain."

In pressing their claim against legislation adverse to their interests, they point out the fact that "the freight rates of this country average only two per cent, of the cost of articles to the consumer, thus making the freight rate so insignificant a factor in the selling price that name ous standard articles are sold at the same price in all parts of the country."

Let Common Sense Decide

Do you honestly believe, that coffee sold loose (in bulk), exposed to dust, germs and insects, passing through many hands (some of them not over-clean), "blended," you don't know how or by whom, is fit for your use? Of course you don't. But LION COFFEE is another story. The green

berries, selected by keen judges at the plantation, are skillfully roasted at our factories, where precautions you would not dream of are taken to secure perfect cleanliness, flavor, strength and uniformity.

From the time the coffee leaves the factory no hand touches it till it is opened in your kitchen.

This has made LION COFFEE the LEADER OF ALL PACKAGE COFFEES. Millions of American Homes welcome LION COFFEE daily.

There is no stronger proof of merit than continued and increasing popularity. "Quality survives all opposition." (Sold only in 1 lb. packages. Lion-head on every package.) (Save your Lion-heads for valuable premiums.)

SOLD BY GROCERS EVERYWEERE

WOOLSON SPICE CO., Toledo, Ohio.
